## Gulf adds additional alloying experience to Board

Gulf Minerals Corporation Limited (**ASX: GMC**) is pleased to advise shareholders of a significant addition to the company's board with the appointment of Paul O'Shaughnessy as non-executive Metallurgical Director.

Paul is a metallurgical engineer with some 40 years of industry experience which includes smelting operations producing both bulk and speciality manganese alloys.

He is a graduate from the Royal School of Mines, Imperial College, University of London with a Bachelor of Science Metallurgy with Honours.

He commenced his career in ferroalloy plant operations in South Africa, followed by employment with a major global metallurgical engineering consulting group before moving back into production as Plant Manager for a substantial Saudi Arabian ferroalloy company. Paul now operates his own consulting business which includes advising on the manufacturing of ferroalloys.

Paul's appointment as director rounds out the board's experience and skills in manganese exploration, mining, processing and marketing together with the Chairman's well recognized corporate governance background.

Non-executive Marketing Director, Michael Walters, commented ..... "I have known Paul for many years and have always been very impressed with the depth of his knowledge and wide experience in the alloying industry. Gulf are most fortunate he is joining our board so the company may draw upon his practical experience as we move into the engineering, construction and operating phases of our smelter enterprise".
